Strategic Insights

Growth Trajectory: Strong 6x revenue growth from 2011-2014 peak, followed by sharp decline requiring investigation of market disruption or operational changes.

Category Strategy: Bikes drive revenue (high transaction value) while Accessories drive volume (59.64% of customers). Strategic focus: Use Accessories for customer acquisition, cross-sell Bikes to maximize lifetime value.

Geographic Risk: United States shows concentrated high-revenue performance. Diversification opportunity exists in underperforming regions (Canada, Germany, France) to reduce market dependency.
